## DETAILED ACTION

### *Specification*

1. The substitute specification filed 4/16/01 has been entered.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 4-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 5804274. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both claim substantially the same material. 5804274 does not claim the size of the loop piles; however, this would be an obvious modification. The skilled artisan would have been motivated to vary loop height by the desire to optimize cleaning properties.

### *Claim Rejections - 35 USC § 103*

Art Unit: 1771

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nordin (WO 96/10946).

Nordin is concerned with the creation of mop comprising two cleaning surfaces (abstract). Said mop comprising microfibers having a dtex below one (p. 2, lines 26-30). Said mop woven or knitted to form short and long loops (p. 2, lines 15-25). Nordin does not seem to specifically teach the loop height. If Nordin's loops are not inherently 3-9 mm, then it would have been obvious to a person having ordinary skill in the art to modify the length of the loops. Such a modification would have been motivated by the desire to optimize the friction, brushing, and accumulation properties of the mop (p. 6, lines 20-30).

Said mop attached to a handle (p. 7, lines 25-29).

Said loops comprising polyamide and polyester filaments (p. 4, lines 24-29).

Said mop comprising flat fibers (p. 5, lines 25-26).

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 3030691, 3126572, 3638270, 4045605, 4340631, 4659602,

Art Unit: 1771

4820566, 4906513, 5055333, 5525393, 5591507, and 5887311 all teach elements of applicant's invention.
